AT&T WIRELESS & CLIFFORD POWER SYSTEMS, INC. RESPOND TO OKLAHOMA ICE STORM/POWER EMERGENCIES

TULSA, OK, DECEMBER 12, 2007: Global communications giant, AT&T Wireless selected Clifford Power Systems, Inc. as their central command center for disaster recovery, dispatch and traffic coordination. Arriving from Atlanta, GA, on Tuesday, December 11th, Clifford Power Systems, Inc. received and coordinated a record load of emergency generators to backup AT&T's wireless cell sites across the Tulsa metropolitan area. Clifford Power served as central command for AT&T operations due to our reliability, experience and professional staff focused on service and emergency response. Clifford Power Systems, Inc. continues to respond to Oklahomans by providing industrial and residential emergency power generators to meet any need with locations in Tulsa and OKC ready to assist.
