24/7 EMERGENCY RESPONSE

1-800-324-0066

Rental Representative: _____

EMERGENCY POWER PLAN FOR BUSINESS CONTINUANCE

1 Plan Prior to the Outage

— Contact your Electrician to determine:

- Utility Service Amperage
- Supply voltage
- Phase rotation
- Connection plan
(Examples: Connect to existing electrical panel; Connect to installed quick-connection panel)
- Appropriate generator size
- Cable distance from generator to electrical connection point
- A level staging area for your rental generator

— Determine fuel supplier for extended outages

— Document necessary information in the following steps

3 Contact your Electrician to Coordinate Connections to Electrical Panel

ELECTRICAL CONTRACTOR:

Name _____

Phone # _____

ELECTRICAL PANEL CONNECTION POINT:

Panel Name _____

Panel Location _____

Phase Rotation Clockwise Counter-Clockwise

2 When a Power Outage Occurs or Power Threat Exists

— Contact your Clifford Power Rental Representative and provide the following:

- Utility Service Size: _____ Amps
- Voltage:
 - 120/240V 1PH
 - 120/208V 3PH
 - 120/240V 3PH
 - 277/480V 3PH
- Generator Size: _____ kW
- Cable Distance: _____ Feet
Note: Clifford Power can determine the required quantity and size of cables.

— Obtain rental generator E.T.A. from Clifford Power

— Obtain estimated run time for the generator's onboard fuel supply

4 Contact your Fuel Vendor to Determine your Fuel Fill Schedule based on the Generator's Run-Time Capacity

FUEL VENDOR:

Name _____

Phone # _____

RENTAL GENERATOR

OPTIONAL TRYSTAR[®] QUICK-CONNECT PANEL

Available for purchase to simplify onsite connections.
